### SECTION 4: FIRST-AID MEASURES

- Inhalation:** If respiratory symptoms develop, move victim from contaminated area to fresh air. If not breathing, apply artificial respiration, preferably by mechanical means. Avoid direct mouth to mouth resuscitation. If symptoms persist, obtain medical attention immediately.
- Skin Contact:** Immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing. Wash with plenty of soap and water including hair and under fingernails. Do not apply any medicated agents except on the advice from a physician. Get medical attention if needed.
- Eye Contact:** Immediately flush eyes with large amounts of running water for at least 15 minutes, holding eyelids apart to facilitate irrigation of the entire surface of the eyes and lids. Do not apply any medicated agents except on the advice of a physician. Get immediate medical attention.
- Ingestion:** **DO NOT INDUCE VOMITING OR ADMINISTER EMETICS EXCEPT ON THE ADVICE FROM A PHYSICIAN.** If victim is fully conscious, give 2 - 3 glasses of water to drink. Contact a physician, hospital or Poison Control Center immediately. Do not give anything by mouth to an unconscious person. To ensure airway is open, position with head lower than body and transport immediately to a medical facility.

**METHOD USED:** Pensky-Martens Closed Tester Method

# GERM BARRIERS

## Safety Data Sheet

**EXTINGUISHING MEDIA:** Carbon dioxide (CO<sub>2</sub>), water fog (or spray), dry chemical, or foam.

**SPECIAL FIRE FIGHTING PROCEDURES:** Self-contained breathing apparatus and protective clothing should be worn in fighting fires involving chemicals. Heat exposure pressurizes closed containers. Cool with water spray. Evacuate area in case of overheating fire.

**UNUSUAL FIRE AND EXPLOSION HAZARDS:** Vapors are heavier than air and can travel along the ground to remote ignition sources. Static electricity may accumulate and ignite vapors. Prevent a possible fire hazard by suitable means, such as, bonding and grounding, inert gas purge, vapor dilution, and the like.

**HAZARDOUS DECOMPOSITION PRODUCTS:** Thermal breakdown of this product during fire or very high heat conditions may evolve the following hazardous decomposition products: Oxides of Carbon

**SECTION 5 NOTES:** None

### SECTION 6: ACCIDENTAL RELEASE MEASURES

**ACCIDENTAL RELEASE MEASURES:** Disposal of collected product, residues, and clean-up materials may be governmentally regulated. Observe all applicable local, state, and federal waste management regulations. Remove possible ignition sources and if needed, use non-sparking tools and equipment. To prevent possible spontaneous combustion, store rags, mops, absorbent, etc., used during clean up only in appropriate containers or covered with water. Determine whether to evacuate or isolate the area depending on such specific factors as site location, population density, traffic flow, size of the release or spill, weather conditions, the material's hazards and risk to people, and whether a fire is underway or possible. Mop, wipe, or soak up with absorbent and contain for salvage or disposal. For large spills, provide diking or other appropriate containment to keep material from spreading. Clean any remaining slippery surfaces by appropriate techniques, such as: several moppings or swabbings with appropriate solvents; washing with mild, caustic detergents or solutions, or high pressure steam for large areas. For non-silicones, use typical industrial cleaning materials. Observe any safety precautions applicable to the cleaning material being used. Local, state, and federal reporting requirements may be applied to spills or releases of this material into the environment. See applicable regulatory compliance information in Section 15.

**SECTION 6 NOTES:** See Section 8 for Personal Protective Equipment for Spills.

### SECTION 7: HANDLING AND STORAGE

**HANDLING:** Wear appropriate personal protective equipment. (See Section 8)

**STORAGE:** Keep container closed and away from heat, sparks, and open flame. Keep container closed and store away from water and moisture.

**OTHER PRECAUTIONS:** Store in original closed container in a secure area inaccessible to children and away from food or feed.

**SECTION 7 NOTES:** None

### SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

**ENGINEERING CONTROLS:**

Local exhaust: Recommended

General Ventilation: Recommended

# GERM BARRIERS

## Safety Data Sheet

**RESPIRATORY PROTECTION:** Use respiratory protection unless adequate local exhaust ventilation is provided or air sampling data show exposures are within recommended exposure guidelines. Industrial Hygiene Personnel can assist in judging the adequacy of existing engineering controls. A suitable respirator would be a self-contained breathing apparatus (SCBA) or other supplied respirator.

**EYE PROTECTION:** Wear protective eyewear (goggles, face shield, or safety glasses with side shields).

**SKIN PROTECTION:** Chemical protective gloves are recommended.
